Entertaining
and
Economist
in the same sentence?
YES!!

You did a wonderful job of making economics interesting to educators. The resounding applause for your presentation told us all what they thought. You helped make the conference memorable for teachers from all over the US ... plus Canada, Ireland, South Africa and the UK.

Last night I attended the first of nine Back-To-School Nights. One of our rookie principals stepped to the microphone and spoke the words of Jeff Thredgold. If you hadn't come to us and shared your powerful and exact information and economic data, this young principal would not have had the knowledge, nor the words, to move those parents. You spoke directly to all 450 people, and each heard you loud and clear.

Hanford (CA) Elementary School District

The lecture you gave in our Nye Lecture Series was absolutely outstanding. You might be interested in some of the comments I received...

"Jeff Thredgold was the most interesting and the most worthwhile..."

"Jeff Thredgold was one of the best we have had."

Weber State University (Utah)

This note is to express my appreciation for your keynote address delivered to the Utah Applied Technology Education Conference, at Utah State University in Logan, Utah. The general session participant evaluations were positive and complimentary. Thanks again for an exciting delivery of a timely message.

Utah State University

Thank you for your excellent presentation at the Federal Women's Program recognizing the contributions of women in federal service. Attendees rated the class as superior and requested it to be scheduled again at future events. Economics can be viewed as a dry and intimidating subject, but you made it enjoyable.
